

Students Project Management System

Previous Project Obstacle / Errors

List of errors or obstacle in the project

1. Trying to access array offset on value of type null

2. Deleted update button and function from 'search faculty' in admin page.

 Please include an '@' in the email address. **Warning**: Trying to access array offset on value of type null in **C:\xampp\htdocs\PMS\ADMIN\stsearch.php** on line **156** is missing an '@'.

Solution : \$row = mysqli_fetch_assoc(rec);

In this we close the if condition bracket so that it displaying as nothing or null and cannot executed be executed.

```
if (isset($_POST['search']))
{
    $username=$_POST['id'];
    $sql1="select * from student where s_id ='$username'";
    $rec=mysqli_query($conn, $sql1);
    $row=mysqli_fetch_assoc($rec);
}
```

Also we make all fields as readonly and removed the update button from it.

3. Display student meetings data in admin page as per faculty_id

Meeting ID	Faculty ID	Student ID	Date	Time	Description
101	f101	s111	2022-03-30	20:30:50	Project proposal presentation
102	f102	s113	2022-03-31	20:30:00	General Meeting
103	f103	s115	2022-06-15	08:57:00	Group Task

Solution : To make list or dropdown faculty_id we had used if – else statement which have SQL query.

4. Problem of duplicate entry in database

Fatal error: Uncaught mysqli_sql_exception: Duplicate entry 's111' for key 'PRIMARY' in C:\xampp\htdocs\PMS\ADMIN\st.php:18
Stack trace: #0 C:\xampp\htdocs\PMS\ADMIN\st.php(18): mysqli_query(Object(mysqli), 'INSERT INTO `pm...') #1 {main} thrown in C:\xampp\htdocs\PMS\ADMIN\st.php on line 18

Solution : there are two options to solve duplicate entry

- 1) Ignore – SQL provided this to discard it silently without generating an error
- 2) Replace – SQL provided this to new record replace with old one

5. Meeting link had type as varchar so it did not use as hyper link.

Solution : We made varchar text of meeting link as href link.

Date :
